### **DETAILED ACTION**

1. The following is an examiner's statement of reasons for allowance: Applicants argument is persuasive that the reference of Kawolics does not define a comparable rotating collect chuck having the special operating conditions of high rotation speed as claimed in claim 3. Prior art fails to teach or fairly suggest the claimed invention a sealing washer in combination of a tool shank, a coolant that provides a build of pressure, the sealing washer having an opening, the opening defining a cylindrical surface with an annular groove, an elastic body disposed in the groove and embracing the tool shaft or shank, the groove being wider and deeper over its entire axial length than the cross-section of the elastic body such that the sealing body is pressed by coolant against a side wall of the groove.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
